📍 Dhaka, Bangladesh

CAREER OBJECTIVE

"To pursue a challenging career as a Software Engineer where I can utilize my programming skills, problem-solving abilities, and passion for technology to contribute to innovative projects and grow professionally."

EDUCATION

BSc in Computer Science & Engineering

Northern University of Bangladesh

CGPA 3.39 out of 4.00 (till 10th semester)

2023 - 2026

PROBLEM SOLVING ACTIVITIES

- CodeChef: ([MD: Shakil Ahammed _](#)), **Highest Rating: 1313**, 1* Coder,
- Codeforces: ([Shajadul Shakil_](#)), **Highest Rating: 838**,
- HackerRank: ([@mdshakilahammed1_](#)),
- LeetCode: ([Md Shakil Ahammed_](#)),

I have solved over **600** data structure and algorithmic problem and participated over 26 online coding contest.

ACHIEVEMENTS & REWARDS

- Bronze Honor – InterviewQuest Explorer, CPS Academy Secured Top 50 position in InterviewQuest-2, demonstrating strong problem-solving and interview preparation skills. (Nov 2025) [Certificate](#)

PROJECTS

- **Garments Order Production Tracker System**
 - Developed a comprehensive web-based platform to help garment factories manage production workflow, order tracking, inventory monitoring, and timely delivery.
 - Features include role-based access control (Admin, Manager, Buyer), order placement with mock payment gateway, real-time order tracking with visual timeline, product management, and admin-based user approval system.
 - The admin panel allows administrators to approve new users, while managers can approve orders and update production tracking status (e.g., "Shipped").
 - **Technology Used:** "Frontend: React, Vite, Tailwind CSS, Firebase Auth; Backend: Node.js, Express, MongoDB". [GitHub Repo](#)
- **Cent Workers**
 - Developed a full-stack MERN-based job marketplace application connecting employers and workers with real-time job management features.
 - Features include Google OAuth authentication via Firebase with JWT-based authorization, RESTful APIs for job posting/updating/deletion, role-based functionality (employers manage listings, workers browse and accept jobs), and efficient data modeling using MongoDB with Mongoose.
 - The platform ensures secure, scalable user access control while allowing employers and workers to interact seamlessly through a responsive interface.
 - **Technology Used:** "Frontend: React, Tailwind CSS; Backend: Node.js, Express.js, MongoDB, Mongoose, Firebase (Google OAuth), JWT". [GitHub Repo](#)
- **Emergency Service Directory**
 - Developed a web-based directory for quick access to Bangladesh government emergency helpline numbers.
 - Features include one-click call simulation, clipboard copy, coin-based call system (20 coins per call with auto refund), call history with timestamps, and like functionality.
 - **Technology Used:** "Frontend: HTML + Tailwind CSS, Backend: Vanilla JavaScript".
 - [GitHub Repo](#) [Live Link](#)

SKILLS

Programming Languages: C, C++, C# (learning), Java, Python, JavaScript (basic)

Web Development: HTML, CSS, Tailwind CSS, React, Django

Backend & APIs: Node.js, Express.js, RESTful APIs, JWT, Firebase (Google OAuth)

Database: MongoDB, Mongoose, Microsoft SQL, SQLite, PostgreSQL (if used)

Cloud & Deployment: AWS S3, Signed URL Uploads, Firebase/FCM, Redis, Railway, Vercel

Tools & Platforms: VS Code, Visual Studio, GitHub, Render, Django Admin
